WHY BRUSSELS

UNDERSTAND BRUSSELS. BUILD YOUR OWN PATH.

Every year thousands of students and young professionals look to Brussels as the place to build a career — in the European institutions, in companies, in trade associations, think tanks, NGOs, law firms, international organisations or the media.

Yet between an interest in Europe and an actual career in the European professional ecosystem there is often a gap that is hard to close. University provides solid theoretical grounding in how the European Union works, but rarely a sense of how Brussels functions as a working environment: where opportunities come from, how relationships of trust are built, which skills genuinely make a difference.

IteraLab exists to close that gap. Through an intensive career orientation programme built around the direct experience of the IteraLab Faculty, participants engage with professionals who work in the European ecosystem every day, and gain concrete tools to guide their own choices.

The Spring Programme 2027 does not teach Europe through theory. It guides participants through a complex professional environment, helping them identify the path that best fits their ambitions, skills and interests.

WHO IS AROUND THE INSTITUTIONS

The European institutions are the centre, but they are not the main employer. Around them lives an ecosystem that hires, every year, far more people.

This is the ecosystem the programme teaches you to read: ten modules, ten different vantage points.

THE PROGRAMME SPEAKERS.

Each edition is built around ten modules: the speakers confirmed for the Spring Programme 2027 are the ones listed here.

HOW IT WORKS

HOW AN ITERALAB SESSION WORKS.

An IteraLab session is not a lecture: it is a career orientation path built on a shared method, followed by the entire Faculty, designed to give participants realistic tools for entering the European job market.

1 THE SPEAKER'S PROFESSIONAL STORY

Studies, first jobs, arriving in Brussels, career choices, obstacles met and chances taken: real paths, rarely linear.

2 HOW THE SECTOR REALLY WORKS

The current role, daily responsibilities, counterparts, files being handled — with a practical case whenever possible.

3 WHAT RECRUITERS LOOK FOR

The technical and soft skills expected of a junior profile, and the most common mistakes in applications.

4 PRACTICAL ADVICE

CVs, motivation letters, LinkedIn, interviews, applications, networking and first professional steps.
